**Recycling Guide
KYOTO
Nakagyo Ward**

1999 version

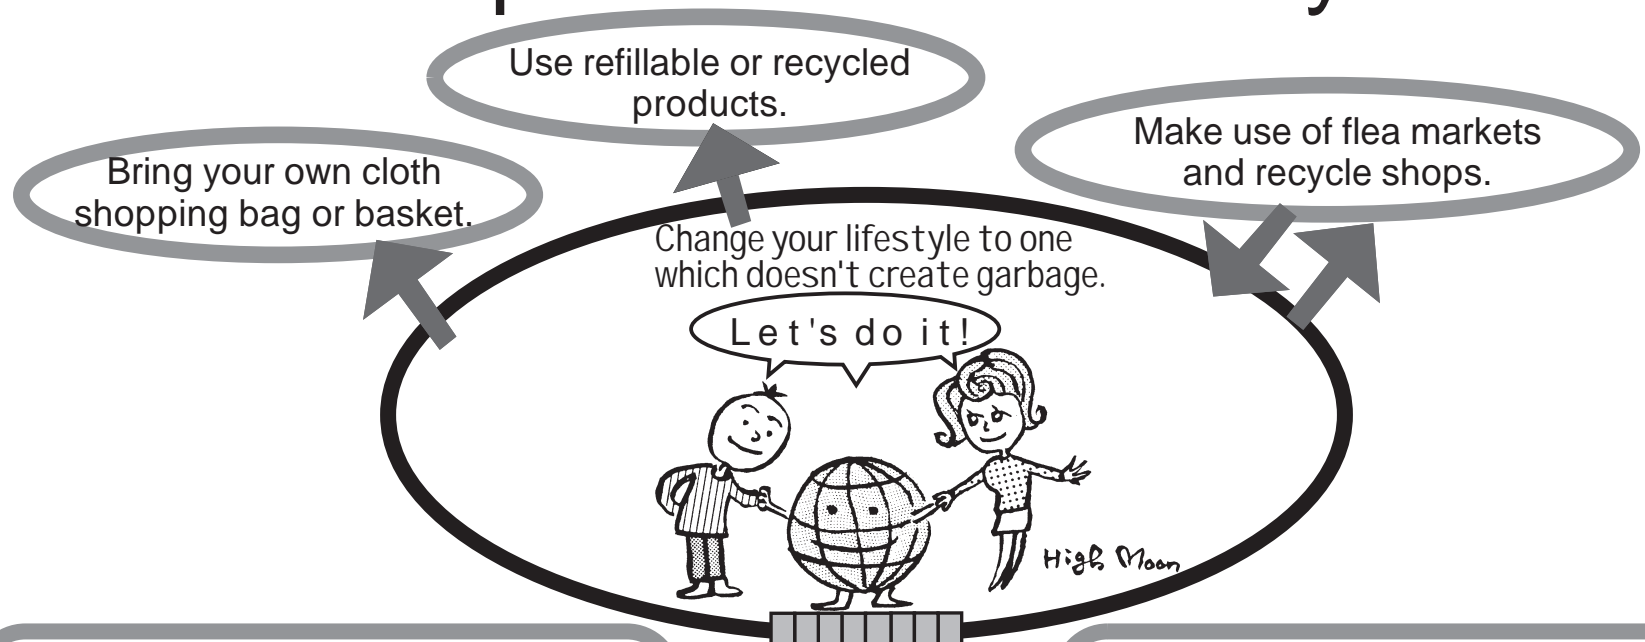

This map has been prepared by
Japan Environmental Exchange

Buy from street vendors vegetables, tofu, flowers. Bring own food container.

How to dispose of trash in Kyoto city

資源ごみ
(空き缶・空きびん・ペットボトル)

収集場所

収集日

Resource garbage

(cans, bottles, PET bottles)

Collection site

Collection day

Cans, bottles and PET bottles should be put in a plastic bag and put out at the site with this yellow sign before 8 a.m. on the once-a-week collection day. Caps and labels should be taken off and thrown out with general garbage.

Collected cans and bottles are separated at Yokooji Gakuen. Please rinse them well to help those who do the work at the next stage. Do you know that it takes one nuclear power plant to supply the power to run all of Japan's vending machines? It requires money and energy to make cans or even to recycle them. Rather, why don't we carry around our favorite tea in a thermos? It would no doubt be good for both the environment and our health! (For free, too!)

Collectable articles

drink cans, food cans

× Non-collectable

stoves, toasters, frying pans
...big garbage collection only
sprays, cassette-type gas cylinders, paints, motor oil
...house garbage
injection needles
...to be returned to your family doctor

× Non-collectable

porcelain, chinaware, cosmetic bottles, light bulbs, fluorescent lights, flower pots, glass, sheets of glass, mirrors, bottles containing powerful drugs.

Returnable bottles such as beer bottles, sake bottles (1.8 litre), and milk bottles should be returned to the shop from which you bought.

Especially beer bottles are 'honor students' of recycling because they can be reused twelve times. Moreover, people say that bottled beer is cheaper and taste better than can beers! Let's drink bottled beer!

Among various kinds of PET bottles, only the ones for beverage and soy sauce with this mark are acceptable.

Wash and rinse out milk cartons and Styrofoam trays and take them back to the shops with a collection box or to neighborhood group collection point.

Not all trays can be recycled, so please check the sign by the collection box.

Batteries are collected at each ward office, cleaning centre, public health centre and city hall. Button-type batteries and Ni-Cd batteries should be returned to the shop.

Put out for neighborhood collection or collectors. Make separate bundles of newspapers, magazines and cardboard and bind them tightly with string. Leaflets and handbills should be tied up together with magazines.

Don't forget to use recycled paper to make recycling work effectively and well.

× Non-collectable

Others
adhesive tapes, file cellophane, films

Paper
envelopes with a window, vinyl-coated paper, paper cups, oilpaper, photographs, fax paper, carbon paper, non-carbon paper

Choose unwrapped or refillable products to reduce garbage. If we use foodstuffs well without waste, the economic effectiveness will be good, too!

Household garbage should be put out at the collection site before 8 a.m. on the twice-a-week collection day.

Drainwater from kitchen waste thoroughly. Sprays and cassette-type gas cylinders should be used up completely and an opening should be made in them so they don't explode or start a fire.

Wrap up glass, razor blades, skewers and knives with a piece of cardboard, tie them up and affix a label which says 'glass' or 'dangerous' on the bundle. If only a small quantity, wrap up with cardboard and put in the garbage bag.

If they are still usable, call the Kyoto City Disused Articles Recycle Information system (tel. 241-0530) and register.

For further information and inquires, call Environmental Bureau (tel. 222-4091 URL is <http://www.city.kyoto.jp/kankyo/recycle/index.html>).

For bulk trash collection (Fee to be charged). You need to make a reservation at ☎0120-100-530.

Then they will tell you the fee for collection. Please buy the bulk trash collection fee tickets at a nearby ticket outlet (such as convenience stores, supermarkets and the ward offices etc.)

For further information, call the bulk trash center. (tel. 691-9376)

There is a charge for returning unwanted, used air conditioners, TV, refrigerators, and washing machines.

Please contact an electrical appliance shops. For more information, call Environmental Bureau at 222-4091.
